STAND ALONE SMART NOZZLE

Shown below is the new TC Smart Nozzle ready to ship in the specially designed storage equipment unit.

The unit contains a fully installed power pack to provide the unit with hydraulic power, bulkhead plate unit for hydraulic power and louvers for air circulation within the unit.

Hydraulic hoses are also provided along with the control station complete with cables.

The control station is designed to be removed from the containment box and placed in a control room or cabin.

The control station also comes with a real time graphical representation of the nozzle movement and position.
